

IOMC 2019

International Outcome Measurement Conference

Sunday, November 3, and Monday, November 4, 2019

Chicago, IL, USA

The American Congress of Rehabilitation Medicine (ACRM), the Shirley Ryan AbilityLab, the Measurement Networking Group of ACRM, and the *Journal of Applied Measurement* have collaborated to organize a health outcome measurement conference to be held in Chicago. This meeting of IOMC marks the first collaboration with [ACRM](#) to share meeting times and location to further enhance the opportunity to share new developments in outcome measurement, meet new colleagues, and reconnect with old friends.

The conference schedule will allow two full days of presentations devoted to the application of Rasch measurement to health outcomes. Registration and housing are through the ACRM conference registration site. The conference will be held at the Hilton Chicago on South Michigan Avenue.

The deadline for proposals for presentations is September 3, 2019. Following peer review, the papers presented at this conference will be scheduled publication in the *Journal of Applied Measurement* beginning in 2020. The *Journal of Applied Measurement* is indexed in Pub Med and *Index Medicus*, which provides medical researchers easy access to the abstracts of the conference papers.

The conference will feature both plenary and concurrent presentations. Attendance at the meeting will be capped at 120, due to size of the meeting space.

The setting in Chicago provides an opportunity to celebrate the roots of the application of Rasch measurement to develop and improve health outcome scales. The work of Ben Wright in the 1970's and 1980's, exemplified by his collaboration with Ross Lambert at the Hines VA Blind Center, the redevelopment of the PECS system with Richard Harvey at Marianjoy Hospital, the work with Carl Granger at SUNY Buffalo on the FIM, and his work with the Rehabilitation Institute of Chicago (now the [Shirley Ryan AbilityLab](#)) on [numerous outcome scales](#), is central to the development of health outcome scales that allow parametric analyses.

Don't miss this opportunity to participate in and hear the latest developments for measuring health outcomes.

For further information, please contact us at IOMC2019@jampress.org or visit the conference website at www.jampress.org and click on the *IOMC2019-Chicago* link for presentation submission forms. The [Hilton Chicago](#) on South Michigan Avenue is ACRM's headquarters hotel. Housing and registration will be available soon on [ACRM registration website](#).
